EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael O. Sturm on 12/19/2003.

The application has been amended as follows:

The specification:

Page 8, line 28, delete the term "or" and insert -- on--.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Note that Applicants' amendment and the declaration filed on 10/02/2003 together are sufficient to overcome the art rejections and claim objections and sufficient to place the instant claims in condition for allowance. The declaration shows that the pre-metallizing treatment of JP'491 does not produce a homogeneous, continuous coating of the conductive polymer on the surface of the openings of the structure as the present invention. Support for this homogeneous, continuous coating is found on page 8, line 28 of Applicants' specification. Additionally, the combination of He et al (US 5,591,482) and JP 06 248491 would lead to a complex porous structure as presently claimed. However, it appears that JP'491 is nonanalogous art which is directed to a battery applications whereas the He reference is related to sponge rolls for

removing electrostatic charge, and pressure sensors, and pressure switches.

There is no motivation to combine these two references together to form the complex porous structure as presently claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
